EDUCATION

Texas A&M University

Bachelor of Engineering in Computer Engineering
Honors

College Station, TX

Aug. 2025 – May 2029

EXPERIENCE

Software Engineer | Sprout

Mar. 2026 – Present

- Engineered a React-based study platform for course-specific tutoring and note-taking across **10+** university courses
- Built a data pipeline to extract and transform **10K+** Supabase records into structured JSON for RAG indexing
- Processed and indexed two **500+** page calculus textbooks in ChromaDB using Python

Software Engineering Intern | SW Utility Billing

May 2026 – Aug. 2026

- Automated invoice extraction and validation in Python, cutting processing time from **4** minutes to **14** seconds per invoice
- Implemented configurable extraction templates using LLM prompts supporting **20+** utility vendors and billing formats
- Validated extracted billing fields against expected values, achieving **95.83%** field-level accuracy across **50+** invoices

Undergraduate Research Assistant | Aggies Lab

Jan. 2026 – May 2026

- Designed a personalized gesture-recognition system supporting **15** custom hand gestures
- Trained TensorFlow/LSTM models achieving **98%** static and **95%** dynamic accuracy across **20+** test sessions
- Presented research findings at Texas A&M Student Research Week to **100+** attendees

PROJECTS

TURTLE: Hatchling

Jan. 2026 – Apr. 2026

- Tuned Arduino control logic through **15+** hardware/software test iterations for **2.5** minute matches
- Redesigned SolidWorks components to satisfy competition size constraints and improve mechanical fit

MidnightShift

Feb. 2026

- Developed a full-stack productivity application to monitor attention, screen activity, and user presence during work sessions
- Achieved **94%** distraction-detection accuracy at **25** FPS with a real-time OpenCV/YOLO pipeline
- Implemented a React dashboard and Flask API for session history, distraction events, and productivity metrics

TECHNICAL SKILLS

Languages: C++, Python, C#, Java, JavaScript, TypeScript, SQL

Systems: Linux, Docker, Git, AWS EC2, REST APIs

Frameworks: React, Flask, FastAPI, Node.js

ML/CV: TensorFlow, PyTorch, OpenCV, YOLO, Hugging Face

Databases: ChromaDB, Supabase, PostgreSQL

AWARDS/ACHIEVEMENTS

Aggies Invent: Pantex | Best Prototype

Sep. 2025

- Developed a YOLO/OpenCV hardware classification prototype processing **6+** items per minute
- Implemented logging and export pipeline storing **30** days of data across **10K+** records

LEADERSHIP & INVOLVEMENT

Events and Marketing Officer at Aggie Coding Club

Mar. 2026 – Present

- Led design and layout efforts for posters read by **1,000+** students, coordinating with a **4** person team to deliver on monthly deadlines
